

FILE NOTE

**BURGESS AND WALKER TRANSPORT
OLD RAILWAY INDUSTRIAL ESTATE, ST IVES**

A DAVAIR waste oil burner used for space heating in this Motor Vehicle Repair Shop was inspected on 23 December 1998.

Externally there was a noticeable odour presented at ground level in the vicinity of the buildings. Internally no such odour existed and whilst the apparatus had a poor visual appearance it was obviously reasonably maintained and functioning without producing any visible smoke.

A satisfactory level of compliance considered to exist.

A handwritten signature in black ink, appearing to read 'J. Robinson', with a stylized flourish at the end.

**J Robinson
24 December 1998**
