November	1997	482.594	136	346.594
December	1997	240.017	136	104.017

12 Month Total: 5503.191

CLAUSE 22

NOTES: -

(A) LOCAL AUTHORITY REQUIREMENTS

This document shows Organic Solvent usage on a 12 month continual total basis.

(A) LOCAL AUTHORITY REQUIREMENTS

Statements of the total Organic Solvent Content of all materials purchased from local suppliers are held on file:-

Main Office

The amount recycled has been based on the following calculations, supplied by the British Coatings Federation. Most solvents contain between 800 and 900 grams per litre. Therefore an average of 850 grams per litre has been used in the calculations for reclaimed solvents. Due to the inconsistencies of calculating the VOC content for each waste solvent produced, only 80% of all solvents returned has been deducted from the total amount of VOC purchased.

ORGANIC SOLVENT USAGE	BAND FOR REGISTRATION
OVER 2000kg	<input checked="" type="checkbox"/>
BETWEEN 1000kg 2000kg	<input type="checkbox"/>
BELOW 1000kg	<input type="checkbox"/>
