

Environmental permit inspection

Name of permitted activity: Sundown Bedding Products Permit: B02/06

Discussed with: Simon Reference: 105995

Inspector's Name: Dave Bass Date: 22/04/2015

Reason for visit:	Notification of blow out of shavings. Discussion on previous fires.	
Issues discussed:	The blow out resulted in shavings being deposited in the farmer's	
	field next adjacent to the installation area, approximately 20	
	metres. It is initially thought the cause was from the sensor not	
	working but failsafe's should've worked as well but didn't. Further	
	investigation is required. The 2 operatives did not notice the blow	
	out occurring.	
	The previous fire was caused by a spark from the dryer blowing	
	onto the straw pile. They are working with the company who	
	devised the spark detection in the straw plant to resolve this. They	
are also going to be more proactive in clearing up spillages and		
maintenance of plant..		
Conditions breached:	3 & 37	
Noise: Plans are in place to replace the broken acoustic fence, fix the absorbent material in		
debarking building and fan to replaced start of May.		
Risk assessment revaluated :		NO
