20 December 2005

Dear Dr Macleod

Re: Information further to the Part B application for Anglo CIL Ltd, Eaton, Socon

Thank you for providing the HPA with supplementary information further to the Part B IPPC application for Anglo CIL Ltd, Eaton, Socon.

We consider that if well managed and regulated by the Local Authority, it is unlikely that an installation of this type would present a health risk to local people. However, we are unable to assess any potential health impacts associated with this installation due to the absence of emissions data from the supplementary information. We are therefore not able to provide any further comments over and above those submitted in our original response

Kind Regards

Dear Aaron,

**APPLICATION FOR A PERMIT TO OPERATE A COATING INSTALLATION AT
ANGLO CIL LIMITED, 20 LITTLE END ROAD, EATON SOCON, ST. NEOTS,
CAMBS, PE19 8SN.**

I have a few comments to make regarding aspects of water quality regulation for the proposed activities.

I would assume that all foul and surface water drainage is connected to the local sewerage and surface water networks. It would be worth checking with Anglian Water to see if they have enough capacity in their sewers to take any additional volumes of effluent that the proposed installation would produce. If this is not the case, then please contact the Environment Agency for further details.

If no surface water sewers are available for the extended parking then interceptors could be used to aid disposal of the surface water. The extra parking areas, especially the new trailer parking, could potentially produce an environmental risk from oil pollution. If required, I would suggest the use of class 1 interceptors to reduce this risk. They can achieve a concentration of less than 5mg/l for oil, removing even small oil droplets that the parking spaces could produce.

If you require further assistance on this matter then please contact the Environment Agency on the number given below.

Yours sincerely,

A. Basham.

Our reference: PPC 31/2375

Dear Mr Morley,

**POLLUTION PREVENTION & CONTROL (ENGLAND & WALES) REGULATIONS
2000 (SI 2000 No. 1973), Part A(2) installations
Application by: Anglo CIL Ltd, St Neots**

I refer to the above application for a permit under the Pollution Prevention and Control Regulations 2000.

From the application there does not seem to be any emissions that would be of concern to the food chain.

Therefore, provided that the Operator complies with the Process Guidance Note PG6/23/04 (Secretary of State's Process Guidance Note for the Coating of Metals and Plastics), it is unlikely that there will be any unacceptable effects on the human food chain as a result of the operations at this installation.

Please note that due to storage problems we shall no longer be keeping PPC application papers and files.

Yours sincerely
