(A) Incident leading to justified complaint but no breach of specific permit condition or of general/residual BAT condition	0 points			
(B) Incident leading to a justified complaint*	5 per incident

### Comments

There has been no notification of any plant movements. Plant should be staying in current location

for the foreseeable future. Plant now screens used planings to ensure that they have a better

product and to remove unnecessary components in the planings which can be used/sold elsewhere

this also reduces heating costs. A preventative maintenance schedule is required to be developed.

Training of the use of the plant needs to be documented. The company has ISO14001 and is

looking at ways to reduce the environmental impact of the plant (see screening of planings)
