Comments

New plant batcher since last inspection. Training record is still being completed as and when required (company operates on an important issue first and works to cover the entire business model). Daily records are kept and includes any defects which are recorded both on the daily record sheet and on the computerised log (which is accessed by management and maintenance) to be actioned. Company procedures/risk assessments available online and specific jobs are created on site depending on the need. Company has ISO14001. Question raised over tree belt which as long as they are stable and do not impede any permit conditions then there are no issues which EH would have any problems with.
