## Comments

Emission test result for 2015-16 showed exceedance which was rectified and retested in June

2016 which showed compliance. No evidence of breach of any permit conditions as all possible

emissions are contained as much as possible. No complaints have been received about the site.

All records are kept on their electronic management system available to employees. The site has

increased their production but no significant breakdowns which shows preventative maintenance is

suitable. Company have their own environmental management system.
