11 April 2002

Dear Mr Chambers

**Environmental Protection Act 1990 - Part 1
Authorisation 6/92 - Compliance Demonstration
Boardcraft Ltd, Units 11 - 12 Howard Rd, Eaton Socon**

I confirm my visit on 10 April 2002 at which time a routine compliance inspection was undertaken with respect to the above authorisation. At the time of visit I was satisfied that the current operations at the site were compliant with the conditions contained within the Authorisation.

During the visit I was able to record the plant sound levels close to neighbouring residential property. On average the LAeq was approximately 60dBA adjacent to the residential properties, the most predominant frequency being within the 125Hz 3rd octave band. I understand the sound insulation of the dust extraction unit has not yet been complete and it is your intention to lag the ceiling and doorway in the same way as the walls. Please advise me when the work is complete so that I may return to record the change in sound level.

If you have any questions regarding the authorisation, please do not hesitate to contact me on the number below.

Yours sincerely

**Aaron J Morley
Environmental Protection Officer
Environmental Health Services Division**
