**13 February 2006**

**Dear Mr Walker**

**Pollution Prevention and Control Act 1999  
Pollution Prevention and Control (England and Wales) Regulations 2000  
Permit 1/92 – Small Waste Oil Burner**

I confirm my visit on 30 January 2006 with yourself and Terry Avery during which time a routine compliance inspection was undertaken with respect to the above permit. At the time of visit I was satisfied that the operations on site were compliant with the conditions contained within the permit.

Due to an administrative change, you will no longer operate in accordance with conditions contained within an authorisation issued under the Environmental Protection Act 1990, you will operate in accordance with conditions contained within a permit issued under the Pollution Prevention and Control Act 1999 and the associated regulations.

This is a convenient time for me to make changes to your conditions to reflect the new Secretary of State's Process Guidance Note for Waste Oil and Recovered Oil Burners of Less Than 0.4MW (PG1/1(04)), which can be found at the following web address:  
[www.defra.gov.uk/environment/airquality/lapc/pgnotes](http://www.defra.gov.uk/environment/airquality/lapc/pgnotes).

I therefore enclose Variation Notice reference PPC 18/05 that officially varies the contents of the permit. The conditions contained within the new permit have immediate effect. The enclosed table highlights the changes that have been made to the conditions. However, I am confident that you need not make any physical changes to the way you operate the waste oil burner as a result of these administrative changes.

If you have any questions regarding the permit, please do not hesitate to contact me on the number below.

Yours sincerely

A handwritten signature in black ink, appearing to read 'A. Morley', with a stylized flourish at the end.
