PPC01/18	Variation	24/04/2018	New Plant, update legislation & address
PPC13/20	Variation	15/01/2021	New Plant

Environmental Permit

Huntingdonshire District Council (the regulator) hereby permits **G Webb Haulage Ltd** to operate a *mobile concrete crusher* as defined in Part 2 of Schedule 1 to the Environmental Permitting Regulations Section 3.5 Part B(c), and as described below in accordance with the following conditions which shall apply forthwith.

Description of Activity

Crusher type: Sandvik QJ241 Jaw Crusher
Serial Number: QJ241-10170

The reduction in size of bricks, tiles or concrete, and other mineral products as designated by regulation, by crushing or grinding. The activity includes the screening of demolition material prior to crushing and any other pre-treatment and also the construction of stockpiles of crushed and screened material.

Materials fed by the loading shovel into the feed hopper are crushed and/or screened ready for stockpiling on site or loading into delivery vehicles.

Potential emissions of particulates are from stockpiles both before and after processing as well as the crushing and sorting of material.

Conditions

Asbestos

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile plant is operated, notify the regulator who issued the permit:
 - a. Where and when the mobile plant is expected to start operating.
 - b. The serial numbers of the mobile plant involved.

Emissions and monitoring

3. The following emission requirements and methods and frequency of monitoring shall be complied with.

	Substance	Source	Emission limit/ provisions	Type of monitoring	Monitoring frequency
(a)	Particulate matter	Whole process	No visible emissions crossing the construction site boundary	Recorded operator observations	On start up and on at least two more occasions each day

Maintenance

4. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufacturer's instructions.

Aggregates delivery and storage

5. Dusty materials (including dusty wastes) shall be subject to suppression and management techniques to minimise dust emissions.

Crushers and screening units

6. Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture
7. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.
8. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimise the potential for wind entrainment.
9. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

Belt conveying

10. All dusty materials, including wastes, shall be conveyed. All transfer points shall be fitted with a chute.

Loading, unloading and transport

11. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by use of enclosed or sheeted vehicles.

Roadways and transportation

12. Vehicles shall not track material from the site onto the highway.

Records and training

13. Written or computer records of all tests, monitoring and maintenance shall be kept by the operator for at least two years.
14. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken.
15. Records shall be kept of operator inspections, including those for visible emissions, training and maintenance.
16. All records shall be made available for inspection by the regulator upon request.

Best available techniques

17. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.
18. If the operator proposes to make a change in operation of the installation, they must, at least 14 days before making the change, notify the regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition 'change in operation' means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

Signed:

Date:15 January 2021.....

Environmental Protection Officer

GENERAL NOTES

1 Variation

The regulator will ensure that the permit remains up to date in line with the requirements set out in Regulation 20(1). This may involve issuing a Variation Notice following amendment to the Secretary of State's Guidance Notes or following receipt of any direction from the Secretary of State.

2 Review of Conditions

The regulator may at any time undertake a review of the conditions in this permit under Regulation 34(1). Where significant pollution is encountered or where there are changes in BAT or where the operational safety of the activity requires other techniques to be used an immediate review shall be undertaken.

3 Appeal

The permitted operator can appeal in writing to the Secretary of State against the items listed in Regulation 31.

Appeals shall be addressed to:	The Planning Inspectorate Environment Team, Major & Specialist Casework Room 4/04 Kite Wing Temple Quay House 2 The Square Temple Quay Bristol, BS1 6PN
--------------------------------	---

4 Transfer of Permit

The permitted operator who wishes to transfer the whole or part of the permit to a person who proposes to carry out the activity in the holder's place may do so in accordance with Regulation 21. Both the operator and the proposed transferee shall jointly make an application to the regulator to effect the transfer. An application shall include the permit and any fee prescribed in respect of the transfer under Regulation 19 and shall contain the operator's and the proposed transferee's contact details.

5 Variation of Conditions of Permits

Under Regulation 20, the operator may apply to the regulator to vary the conditions contained within the permit. Such application shall be made in accordance with Part 1 of Schedule 5 and shall be accompanied by any fee prescribed in respect of the application under Regulation 19; and paragraphs 8 of Part 1 of Schedule 5 and paragraphs 5(3) and (4) of schedule 5 shall have effect with respect to such applications.

6 Other Legal Requirements

This permit is issued solely for the purpose of the Pollution Prevention and Control Act and its associated Regulations and the operator must ensure that he complies with all other statutory requirements.

7 Annual Subsistence Charge

The Secretary of State has drawn up a charging scheme under Regulation 19. Under this scheme Local Authorities are required to levy an annual subsistence charge related to the permit. The Local Authority will invoice for the amount due which is subject to annual review by the Department of the Environment Food and Rural Affairs.
