

## **Risk Assessment for Local Air Pollution Control**

Name of permitted activity:	Linx Printing Technologies Ltd	PG Note:	PG6/45(11)
Discussed with:	Mr Andy Mee	_LA Reference:	B18/14
Inspector's Name:	Dave Bass	Date:	03/11/2015

Component 1 - Inherent Environmental Impact Potential				
APRR Risk Rating Category	Possible	Possible Scores Scor		
(A) Category 1	10	10		
(B) Category 2	20	20		20
(C) Category 3	30			
Component 2 - Progress with Upgrading				
Status of Upgrading	Possible	Possible Scores		Score warded
(A) Upgrading not complete but PG Note deadline has yet to be reached	5	5		
(B) Upgrading not yet complete and PG Note deadline has passed	10	10		
(C) Upgrading complete and meets BAT Requirements	0	0		0
(D) Emissions control exceeds BAT Requirements	<del>-10</del>	-10		
Component 3 - Sensitivity and Proximity of Receptors				
	Sens	Sensitivity of Receptors		
Proximity to Emission Source	High	Mediu	m	Low
(A) < 100m <sup>*</sup>	<del>20</del>	12		5
(B) 100 - 250m <sup>*</sup>	<del>12</del>	10		3
(C) 250 - 500m <sup>*</sup>	5	3		1
(D) >500m*	0	0		0

All distances should be multiplied by a factor of 2 for mineral and cement & lime processes and by a factor of 4 for combustion, incineration (not cremation), iron & steel and non-ferrous metal processes.

Note: Distances should be measured from the process itself, rather than the site boundary.

## **Component 4 - Other Targets**

	Possible Scores	Score Awarded
(A) Other air pollution problems in the local area to which process is a potential contributor	<del>10</del>	
(B) No such air pollution problems	0	0
Total Score for Environmental Impact Appraisal	Range 0 to 70	30

Operator Performance Appraisal

(A) Incident leading to justified complaint but no breach of specific permit condition or of general/residual BAT condition  (B) Incident leading to a justified complaint  (C) Breach of permit not leading to formal action  (D) Incident leading to formal caution, Enforcement Notice or prosecution  (E) Incident leading to a Prohibition Notice  Total  **Unjustified complaints may be e.g. those considered by the inspector to be unreaso linked to an incident at the process.  Where facility has been on Reduced Charge due to Mothballing or Reduced Op  (f) Failure to notify the regulator or restart or increase in level of operation to above the threshold requiring a permit at the installation in accordance with the acceptance letter  Total (applies only when condition F has been breached)  Scoring for Component 6 - Assessment of Monitoring, Maintenance and Record Criterion  (A) All monitoring undertaken to the degree required in the permit?  (B) Monitoring requirements reduced because results over time show consistent compliance?	0 5 pe 10 pe 15 pe 20 pe (M		t t t	Sco Awar		
condition or of general/residual BAT condition  (B) Incident leading to a justified complaint  (C) Breach of permit not leading to formal action  (D) Incident leading to formal caution, Enforcement Notice or prosecution  (E) Incident leading to a Prohibition Notice  Total  **Unjustified complaints may be e.g. those considered by the inspector to be unreasolinked to an incident at the process. ## **Comments**

Emission testing being undertaken during inspection. Initial reports shows that one line is slightly
exceeding so work will need to be done to understand why and reduce emissions in that line. More
work needed on fugitive/solvent consumption figures. Maintenance procedures available for all
employees to assess. Company has ISO14001 so procedures and training records are adequate.
